

# ShipStation - NetSuite Connector

Streamline logistics by integrating ShipStation with NetSuite

**ORACLE**  
NETSUITE

novamodule

**ShipStation**®

Customers rely on Nova Module to integrate  
ShipStation with NetSuite

*"Nova Module met our needs in an exceptional way with the ShipStation to NetSuite connector, both with the end product and in the development process. They were uniquely responsive and accommodating to us as the customer. We will use Nova Module again as they've set the bar high for product quality and customer service."*

Streamline logistics by seamlessly integrating ShipStation with NetSuite ERP. Nova Module has helped companies streamline logistics with this integration.

## Connector Functionality Highlights

**Orders and Order Cancellation:** Orders (or fulfillments in Picked/Packed status) are exported out of NetSuite and imported into ShipStation. Orders can be cancelled bi-directionally.

**Fulfillment:** Upon shipping orders in ShipStation, fulfillment data is imported into NetSuite. The data typically includes carrier, shipping methods, tracking numbers, shipping cost, etc.

**Product Data:** Product updates are exported out of NetSuite and product data is updated in ShipStation - name, description, weight, dimensions, harmonization code, etc.

**Amazon Seller-Fulfilled Prime (SFP) Add-on:** This functionality is supported via an add-on. A thorough review of your business use-case(s) is required to configure this add-on properly.

**Integration Management:** Manage/monitor integration flows with an intuitive dashboard.

## Connector Highlights

Built on a true iPaaS platform - <a href="https://integrator.io">integrator.io</a>	State-of-the-art mapping capability
Installs in minutes	Easy configuration options
Highly customizable	Add-ons to extend functionality available
User friendly integration dashboard	Manage your integration on your own

## Price

Connector Edition	Price (USD)
Standard	Subscription (annual): \$1,500 Setup (one-time): \$2,000
Premium	Subscription (annual): \$1,800 Setup (one-time): \$2,500
Enterprise	Subscription (annual): \$2,100 Setup (one-time): \$2,500
Amazon Seller-Fulfilled Prime (SFP) Add-on	Subscription (annual): \$1,200 Setup (one-time): \$1,500

- Setup price is a general guideline and may be adjusted after reviewing your integration requirements
- Although not common, some add-ons may be required to meet your integration requirements
