Businesses Integrate Cloud-based Systems
Using Nova Module's Integration Solutions

"The team at Nova Module has been very helpful and customized the connector to our needs. The data imported has been accurate down to the smallest detail."

Jeremy Byers, CTO, Nature's Farmacy

Improve Business Processes by Integrating WooCommerce with NetSuite

Automate back-end processes as much as possible using innovative integration technology. Spend saved time on strategies that actually require human input.

Connector Functionality

Orders and Customers: Customers and Orders are exported out of WooCommerce and imported into NetSuite.

Orders Status Change: Once a sales order is billed in NetSuite, the connector changes the status of a sales order in WooCommerce to any status deemed necessary (usually to Completed).

Fulfillment: Fulfillment data is exported out of NetSuite and imported into WooCommerce once shipping is processed in NetSuite. The data typically includes tracking numbers, shipping methods on fulfillment, etc.

Billing: Relevant sales orders are auto-billed in NetSuite and, if needed, billing data is exported out of NetSuite and imported into WooCommerce.

Inventory Quantity: Inventory quantity (typically quantity available per product) is exported out of NetSuite and imported into WooCommerce.

Product Data: Product data gets exported out of NetSuite and imported into WooCommerce.

Add-ons: Multi-store, One-World, and other add-ons are available as needed.

Custom Data Flows: Net new custom data flows can be developed to meet your business requirement.

Customizations: Further customization of the out-of-the-box connector is possible as needed. In addition, net new custom data flows can be developed to meet your business requirement.

Integration Management: Manage and monitor integration flows and errors with an intuitive dashboard.

Connector Highlights

Built on a true iPaaS platform - integrator.io	State-of-the-art mapping capability
Installs in minutes	Easy configuration options
Highly customizable	Add-ons to extend functionality available
User friendly integration dashboard	Manage your integration on your own

Price

Connector Edition	Price (USD)
Standard	Subscription (annual): $3,000 Setup (one-time): $3,500
Premium	Subscription (annual): $4,800 Setup (one-time): $5,000

- Setup price is a general guideline and may be adjusted after reviewing your integration requirements
- Some add-ons, custom data flows, and customizations may be required to meet your integration requirements
