## Shipwire - NetSuite Integration App

Optimize your fulfillment process with our Shipwire-NetSuite Integration App.

The Shipwire - NetSuite Integration App (IA) is a pre-built integration solution automating the inventory management, warehousing and fulfillment processes between Shipwire, a world leader in fulfillment and logistics and NetSuite, one of the leading ERP systems on the market.

### Integration Highlights

Connect two endpoints via stand-alone SaaS products - Integration Apps. Enable a hands-on and front seat view of the connection between two endpoints to better manage your integration and scale alongside your business as it grows.

#### Powered by Celigo's iPaaS platform

integrator.IO, integration management is more hands-on with direct access into settings and configuration.

#### Error management

By way of an intuitive error monitoring dashboard, gain direct visibility into each datasync.

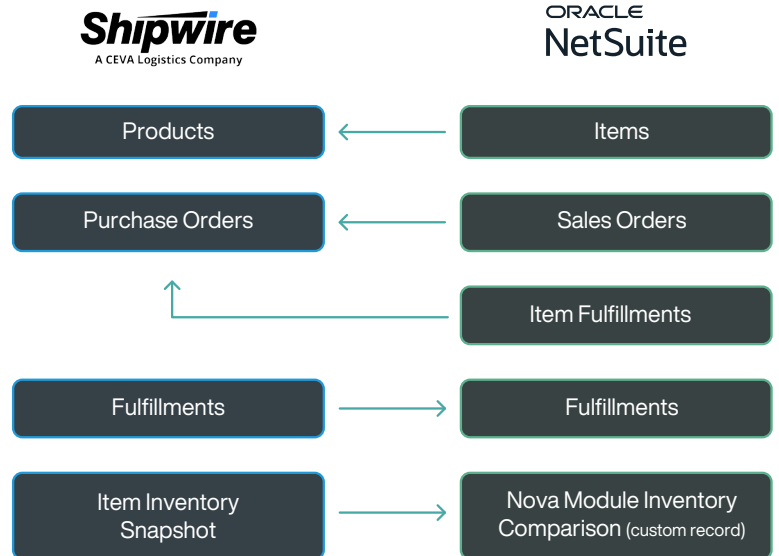

#### Business evolution

The world of ecommerce never stops revolving, therefore your business will continue evolving. Find the perfect fit for your business whether you use the pre-built integration, or build a custom fit connection.

Nourish customer growth and retention as you streamline the fulfillment process, even during peak seasons!

# Advanced Integration Capabilities

## Products

- Export Items from NetSuite to Shipwire
- Mass update Shipwire Item IDs in NetSuite

## Orders

- Export NetSuite Sales Orders to Shipwire
- Export NetSuite Item Fulfillments to Shipwire

## Fulfillments

- Export Shipwire Fulfillments to NetSuite

## Inventory

- Import Inventory Snapshot data from Shipwire to NetSuite. The Inventory Snapshot data is saved in Novamodule Inventory Comparison records which gives users the option to review the inventory levels and then create the Inventory Adjustment (using a NetSuite UserEvent script)

## Integration Management

- The integration features robust error monitoring and management capabilities via the integration dashboard and email notification.
